App Description:

"Fix It For Me" is more than just a directory of technicians' numbers; it's a smart home assistant. The idea is to transform the frustrating process of home repairs into a safe and reliable digital journey. The app combines geolocation technology with a precise rating system to ensure the most skilled tradespeople (plumbers, electricians, carpenters) arrive as quickly as possible and at a fair price. It guarantees you safety, trust, and speed all at once. We strive to provide access to the most skilled craftsmen and tradespeople, and also help tradespeople reach reliable customers and avoid frustrating haggling.

Our app is suitable for any user, whether homeowner, renter, someone living abroad for education or work, or even tradespeople.
